AGREEMENT

WELL DRAINAGE

TWIN FALLS CANAL COMPANY,

Party of the First Part.

Stephen Bell

Party of the Second Part.

N.W. 1/4

Sec. *19* Tp. *10* R. *17*

10/6 191*6*

AGREEMENT

This Agreement, Made this 6 day of Oct. 1916
by and between the TWIN FALLS CANAL COMPANY, an Idaho corporation,
party of the first part, and Stephen Bidlake.

party of the second part, witnesseth:

Whereas, the following described land, to-wit: NEW IRN E
19-10-17

in Twin Falls County, Idaho, is at present being injured by seepage; and, whereas, the first party is about to bore one or more wells on or near said land under the direction of _____, a drainage engineer, for the purpose of determining the effect of such wells in draining said seeped land;

Now therefore, in consideration of the premises, it is hereby agreed:

(1) That the first party may at its option and under the direction of said engineer bore one or more wells on or near said land, the number, size, depth, character, and location to be designated by said engineer, that the first party shall have the right to enter on said lands and do and perform any and all things reasonably necessary in the judgment of said engineer in the furtherance of said work.

(2) The cost of boring said wells shall in the first instance be borne by the first party; but, the second party agrees to reimburse the first party to the extent of Fifteen dollars (\$15.00) per acre for any and all lands drained, the number of acres, if any, to be determined by the said engineer.

(3) It is understood that the first party does not in any wise admit or acknowledge that the seepage hereinbefore referred to or any part thereof, is the result of any neglect or other act or omission on the part of the first party, or that it is in any wise responsible for same, or that the first party in any wise admits or acknowledges a liability on account of same, or liability or responsibility to install the said or any system of drainage, or the right to second party to damage.

(4) It should be understood that should a flow of water be obtained by reason of said well, the same shall be subject to the use of the first party for irrigation, and second party will grant to the first party a free easement and right of way for ditches or waterways necessary to carry said water to the place or places desired by first party in order to utilize or dispose of same.

In Witness Whereof, the first party has caused the same to be executed by the hand of its secretary; and, the second party has set his hand the day and year first above written.

TWIN FALLS CANAL COMPANY,

By _____ Secretary

Stephen Bidlake

Contract #67
Stephen Bislake - F. C. Boone
Four Falls, Ida -
M.W. Sw. W.E., 19-10-17.

Six wells, 680 ft. of 8" and 100 feet of 10" tile
have relieved that portion of the tract east
of "L. coulee" to an extent which promises
to be permanent. Nothing has been done
on the west side of this coulee.

3 Acres have been relieved.

May 28 - 1918

Old Harris

July 27 - 1932

The tunnel drilled on the
SE NW NE seems to have finished draining
this land also as all the tile lines are dug
up to this date and the land west of the
coulee needs irrigation as the pasture
grass needs water. See map in Cont. # 20

Stephen Bedlake

Cont # 67

N.W. - S.W. - NE Sec. 19-10 17

Present Owner F.C. Boone

The land is dry on the surface and has some crop of alfalfa tho it is not entirely reclaimed. Mr Boone says that the water-table rises to very near the surface on both sides of the coulee.

The water in wells drilled is as follows

Well #	1	- to water	2' 1"	from surface
"	# 2	" "	2' 4"	" "
"	# 3	" "	3' 3"	" "
"	# 4	" "	3' 8"	" "
"	# 5	" "	4' 0"	" "
"	# 6	" "	6' 6"	" "

Well no 6 is on higher ground than the others. none of these wells are tiled so are doing no good.

The tile line of 8" tile is too near the surface to do any good and had no discharge.

It is my opinion that the coulee should be cut out lower and the wells topped at a lower elevation.
